GENERAL INFORMATION
BRANDT SEQUESTAR 6% Fe EDDHA is a water soluble form of iron EDDHA that is readily available to plants. It can be applied to prevent or correct iron deficiency (chlorosis). This product may be used at any time, but spring applications before the flush of growth or around planting time are recommended to provide iron when the plant’s need is greatest.

DIRECTIONS FOR USE
FOLIAR APPLICATION: BRANDT SEQUESTAR 6% Fe EDDHA may be applied in water or in combination with most pesticides. Thorough coverage and the use of wetting agents often enhance nutrient uptake from foliar sprays. Before general application, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity. Avoid applying this product during periods of high temperature and low humidity, or when plants are suffering from moisture stress.

VEGETABLE CROPS including beans, carrots, celery, cole crops, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, spinach, sweet corn, tomatoes:

- For ground equipment, apply 1 to 1-1/2 lbs. per acre in sufficient spray volume for thorough coverage. For aerial applications, apply 1/2 to 1 lb. per acre in at least 10 gal. water. Begin 4-6 weeks after planting or when deficiency symptoms appear and repeat as needed at 2-3 week intervals until bloom.

FIELD CROPS including alfalfa, corn, dry beans, peas, forage grasses, rice, safflower, sorghum, sugar beets, sugarcane:

- Apply 1/2 to 1 lb. per 100 gal. of cover spray any time after harvest and until bloom for the succeeding crop. DO NOT apply when fruit is on the tree. DO NOT use in combination with oils or miticides.

TREES (CITRUS):

- Apply 1/2 to 1 lb. per 100 gal. of cover spray at 4-6 weeks after full bloom. If deficiency persists, apply 1-2 additional sprays at 2-3 week intervals. DO NOT use in combination with oils or miticides.

TREES (excluding citrus):

- Apply 1/2 to 1 lb. per 100 gal. of cover spray at 4-6 weeks after full bloom. If deficiency persists, apply 1-2 additional sprays at 2-3 week intervals. DO NOT use in combination with oils or miticides.

VINE AND BERRY CROPS including cranberries, grapes, and strawberries:

- For ground equipment, apply 1 to 1-1/2 lbs. per acre in sufficient spray volume for thorough coverage. For aerial applications, apply 1/2 to 1 lb. per acre in at least 10 gal. water. Begin 4-6 weeks after planting or when deficiency symptoms appear and repeat as needed at 2-3 week intervals until bloom.

FIELD CROPS including alfalfa, corn, dry beans, peas, forage grasses, rice, safflower, sorghum, sugar beets, sugarcane:

- Apply 1/2 to 1 lb. per 100 gal. of cover spray any time after harvest and until bloom for the succeeding crop. DO NOT apply when fruit is on the tree. DO NOT use in combination with oils or miticides.

VINE & BERRY CROPS including cranberries, grapes, and strawberries:

- Apply 1 to 1-1/2 oz. per 100 sq. ft. of row in early spring or when deficiency symptoms appear. Incorporate or irrigate into soil.

TURF:

- Broadcast up to 2 oz. per 100 sq. ft. or band 2-4 oz. per 100 feet of row. Irrigate into soil.

For the agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist or write to Brandt Consolidated Inc.

SOIL APPLICATION: BRANDT SEQUESTAR 6% Fe EDDHA is formulated with EDDHA chelate to extend iron availability to plants, especially those grown in calcareous, alkaline or acid soils. It may be dissolved in water or liquid fertilizers, then applied to the soil as a spray or via drip, sprinkler or furrow irrigation. It may also be dry blended with dry fertilizers or inert carriers (such as sand) then broadcast, banded or sidedressed. For best results, this product should either be incorporated into the root zone at planting, injected into the root zone, or surface applied and moved into the root zone by tillage, drenching, irrigation or rainfall.

VEGETABLE CROPS including beans, carrots, celery, cole crops, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, spinach, sweet corn, tomatoes:

- Apply 1/3 pound of BRANDT AERIAL APPLICATION:

TURF – General Turf, Golf Greens, or with Growth Regulators:

- Apply 1-2 oz. per 1,000 sq. ft. in sufficient spray volume for thorough coverage.

NET WEIGHT: 5 LB / 2.2 KG
PACKED: 10 X 5 LB / 2.2 KG
