Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used when visiting rodent burrows, in corners and concealed places, between floors and walls, or in locations where rats or mice are known to feed. For indoor use, tamper-resistant bait stations must be used in locations where children or pets cannot access bait, or where there is a potential for scavenging mammals, birds or reptiles to be attracted to the bait. Bait stations must be secured or otherwise immobilized when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas where such use is anticipated. Stronger bait stations are needed in areas where such use is anticipated. Stronger bait stations are needed in areas where such use is anticipated.
